

WARNINGS:

Hazard Statements: May be harmful if swallowed. May be harmful in contact with skin. Toxic if inhaled. May cause damage to organs through prolonged or repeated exposure. Very toxic to aquatic life with long lasting effects.

- **Re-entry Interval:** Do not enter treated area within 1 day after treatment unless wearing protective clothing.
- In case of poisoning call a physician and make this label available to him/her.

Aerial Application Warning: Notify all inhabitants in the immediate vicinity of the area to be sprayed and issue the necessary warnings. Do not spray over or allow the drift to contaminate water or adjacent areas.

DISCLAIMER:

Although this remedy has been extensively tested under a large variety of conditions, the registration holder does not warrant that it will be efficacious under all conditions because the action and effect thereof may be affected by factors such as abnormal soil, climatic and storage conditions, quality of dilution water, compatibility with other substances not indicated on the label and the occurrence of resistance of weeds against the remedy concerned, as well as by the method, time and accuracy of application. The registration holder furthermore does not accept responsibility for damage to crops, vegetation, the environment, or harm to man or animal or for lack of performance of the remedy concerned due to failure of the user to follow the label instructions or to the occurrence of conditions which could not have been foreseen in terms of the registration. Consult the supplier in the event of any uncertainty.

PRECAUTIONS:

Precautionary Statements

Prevention: Do not breathe vapours, spray. Use only outdoors or in a well-ventilated area. Avoid release to the environment.

Response: IF INHALED: Remove person to fresh air and keep comfortable for breathing. Call a poison center or doctor if you feel unwell. Get medical advice/attention if you feel unwell. Collect spillage.

Storage: Store in a well-ventilated place. Keep container tightly closed. Store locked up.

Disposal: Dispose of contents and container to an approved waste disposal plant.

- Avoid drift of spray onto other crops, grazing, rivers, dams and areas not under treatment.
- Clean applicator before using with other materials. Dispose of wash water where it will not contaminate food, grazing, rivers or dams.
- **TRIPLE RINSE the empty container as follows:** Invert the empty container over the spray or mixing tank and drain for at least 30 seconds after the flow has slowed down to dripping. Thereafter rinse the empty container *three times in succession* with one quarter of the container volume fresh water and decant the rinsate into the spray or mixing tank. Puncture the triple rinsed container and dispose of via an approved collector or recycler (www.croplife.co.za). Do not bury, burn or donate the container to any other parties that may use it as a container for food or beverages.
- Destroy empty container by perforation and flattening and dispose of it in a safe way.
- Never re-use the empty container for any other purpose.
- Prevent contamination of food, feeds, drinking water and eating utensils.

RELEVANT SUBSTANCES:

NAME	PRODUCT IDENTIFIER
Terbutylazine TC	CAS-No.: 5915-41-3
Monoethylene glycol	CAS-No.: 107-21-1

RESISTANCE WARNING:

For resistance management, **TERBUTYLAZINE 500 SC** is a group code 5 herbicide. Any weed population may contain individuals naturally resistant to **TERBUTYLAZINE 500 SC** and other group code 5 herbicides. The resistant individuals can eventually dominate the weed population if these herbicides are used repeatedly. These resistant weeds may not be controlled by **TERBUTYLAZINE 500 SC** or any other group code 5 herbicide.

To delay weed resistance:

- Avoid exclusive repeated use of herbicides from the same herbicide group code. Alternate or tank-mix with products from different herbicide group codes.
 - Integrate the control methods (chemical, cultural, biological) into weed control programmes.
- For specific information on resistance management contact the registration holder of this product.

TERBUTHYLAZINE 500 SC

Reg. No. / Nr L9328 Act No. 36 of 1947 / Wet Nr 36 van 1947

HERBICIDE

**READ THE LABEL AND ATTACHED PACKAGED LEAFLET BEFORE USE
KEEP OUT OF REACH OF CHILDREN AND ANIMALS**

HRAC HERBICIDE GROUP CODE:

5

HRAC ONKRUIDDODERGROEP KODE:

A pre-emergence suspension concentrate herbicide for the control of a broad spectrum of annual weeds in apples, vines and citrus and post-emergence control of broadleaf weeds in maize as well as for the prevention of weed growth on industrial sites and other non-crop areas.

'n Voor-opkoms suspensie konsentraat onkruiddoder vir die beheer van 'n breë spektrum eenjarige onkruike in appels, wingerd en sitrus sowel as vir die na-opkoms beheer van breëblaaronkruid in mielies en die voorkoming van onkruidgroei op industrieële gebiede en grond wat nie vir landbou gebruik word nie.

ACTIVE INGREDIENT/AKTIWE BESTANDDEEL:

Terbutylazine/ (triazine) 488 g/l Terbutilasien (triasien)
Other triazines 12 g/l Ander triasiene

Hazard Statements:

May be harmful if swallowed.
May be harmful in contact with skin.
Toxic if inhaled.
May cause damage to organs through prolonged or repeated exposure.
Very toxic to aquatic life with long lasting effects.

Precautionary Statements:

Do not breathe vapours, spray.
IF INHALED: Remove person to fresh air and keep comfortable for breathing.
Call a poison center or doctor if you feel unwell.

MODE OF ACTION:

Selective, systemic herbicide, absorbed primarily by roots, but also by foliage, translocated acropetally in the xylem and accumulating in the apical meristems and leaves.

USE RESTRICTIONS

- Do not apply **TERBUTHYLAZINE 500 SC** to pear or stone fruit trees.
- Do not apply **TERBUTHYLAZINE 500 SC** to vines, citrus or apple trees within one year after transplanting. Avoid treatment of young interplants in established vineyards and orchards.
- Do not apply **TERBUTHYLAZINE 500 SC** to vines, apple and citrus experiencing trace element deficiencies or those growing in brackish soil conditions.
- DO NOT APPLY **TERBUTHYLAZINE 500 SC** TO ALKALINE SOILS AND/OR SHALLOW SOILS THAT ARE SUBJECT TO WATERLOGGING.
- **TERBUTHYLAZINE 500 SC** has a relatively long residual activity in the soil and susceptible crops such as winter cereals, legumes, vegetables, etc., should not be planted within 18 months of the soils being treated with **TERBUTHYLAZINE 500 SC**.
- If **TERBUTHYLAZINE 500 SC** is used in a tank mix with glyphosate or simazine formulations or any other herbicide, adhere to the restrictions applying to those herbicides.

WEEDS CONTROLLED

The following weeds are normally controlled by TERBUTHYLAZINE 500 SC	
Broadleaf weeds	
<i>Acanthospermum australe</i>	Eight-seeded prostrate starbur
<i>Acanthospermum glabratum</i>	five-seeded prostrate starbur
<i>Amaranthus hybridus</i>	common pigweed
<i>Amaranthus thunbergii</i>	red pigweed
<i>Amaranthus deflexus</i>	Perennial pigweed
<i>Amaranthus spinosus</i>	Thorny pigweed
<i>Bidens bipinnata</i>	Spanish blackjack
<i>Bidens pilosa</i>	blackjack
<i>Chenopodium album</i>	white goosefoot
<i>Chenopodium carinatum</i>	green goosefoot
<i>Cleome monophylla</i>	Spindropod
<i>Cleome rubella</i>	Pretty lady
<i>Commelinia benghalensis</i>	Bengal wandering Jew
<i>Crotalaria sphaerocarpa</i>	Mealie Crotalaria
<i>Datura rerox</i>	Large thorn apple
<i>Datura stramonium</i>	Thorn apple
<i>Digitaria sanguinalis</i>	Crab fingergrass
<i>Echinochloa colona</i>	Marsh grass
<i>Eleusine indica</i>	Goose grass
<i>Gallinago parviflora</i>	gallant soldier
<i>Gisekia pharmacoeoides</i>	Gisekia
<i>Ipomoea purpurea</i>	Common morning glory
<i>Hibiscus trionum</i>	Bladderweed
<i>Hibiscus cannabinus</i>	Kenaf
<i>Nicandra physaloides</i>	Apple of Peru
<i>Oenothera stricta</i>	Evening primrose
<i>Physalis angulata</i>	wild gooseberry
<i>Portulaca oleracea</i>	puslane
<i>Urochloa panicoides</i>	Herringbone grass
<i>Richardia brasiliensis</i>	Tropical Richardia
<i>Schkuhria pinnata</i>	dwarf marigold
<i>Tagetes minuta</i>	khaki weed
<i>Vigna vexillata</i>	Wild cow-pea
<i>Xanthium strumarium</i>	Cocklebur

TERBUTHYLAZINE 500 SC does not control established weeds or weeds that develop from underground vegetative material such as rootstocks. The degree of control and duration of effect depends on weed species, weed size, growing conditions at and following the period of application, rainfall and soil organic matter content.

DIRECTIONS FOR USE: (Use only as directed)

COMPATIBILITY:

TERBUTHYLAZINE 500 SC is known to be compatible with glyphosate, simazine formulations and mesotrione. Note, however, that the formulation type of such products as well as the quality of the spray-water can affect the compatibility of **TERBUTHYLAZINE 500 SC** with other products. The registration holder does not accept responsibility for the compatibility of **TERBUTHYLAZINE 500 SC** with other products since the formulation of other products can be altered without the knowledge of the registration holder and the quality of water can vary from farm to farm. For this reason it is recommended that a compatibility test be carried out prior to application.

MIXING INSTRUCTIONS:

Shake well before use. Replace screw cap after use.

Half-fill the spray tank with water and start agitation. Pour the required quantity of **TERBUTHYLAZINE 500 SC** through a 50 mesh sieve into the tank. Top up the tank with water to the final volume required. Ensure thorough agitation during filling. When used a tank mixture with glyphosate based products ensure that the **TERBUTHYLAZINE 500 SC** is added last.

Ensure thorough agitation during filling and spraying operations.

APPLICATION

TERBUTHYLAZINE 500 SC can be applied with any medium- or high volume sprayer fitted with an efficient agitation mechanism, which is capable of giving adequate coverage and even distribution. Best results are obtained with fan-type spray tips that apply at least 200 l spray mixture per hectare.

TERBUTHYLAZINE 500 SC is mainly absorbed by the roots of weed seedlings and has very little or no effect on established weeds. Where weeds have already emerged, these weeds must first be destroyed through cultivation or a suitable post-emergence herbicide before **TERBUTHYLAZINE 500 SC** is applied. In situations where the weeds are still small or where the infestation is very light **TERBUTHYLAZINE 500 SC** can be applied as a tank-mixture with a post-emergence herbicide provided it is compatible. Where the weed stand is well established and dense, **TERBUTHYLAZINE 500 SC** will not reach the soil surface due to the shading effect of the weeds. In such situations the weeds must first be killed with a post-emergence herbicide before **TERBUTHYLAZINE 500 SC** can be applied.

AGRICULTURAL USE:

CROPS: APPLES, VINES AND CITRUS

Application Rates:

CROP	TERBUTHYLAZINE 500 SC l/ha	TIMING OF APPLICATION
Dryland and Irrigated Bush Vines	3.5 l/ha	Pre-bud
Irrigated Trellis Vines	3.5 l/ha	Early Spring
Apples	3.5 l/ha	During Spring
Citrus	3.5 l/ha	During Spring

In the case of band applications, the dosage rates remain the same although correspondingly less of the spray-mixture will be applied per actual hectare. Check with your **TERBUTHYLAZINE 500 SC** supplier if in doubt.

TERBUTHYLAZINE 500 SC can be mixed with SC formulations of simazine when used in apples, citrus and vines to increase the residual effect on grasses. Use an application rate of 2.7 l/ha **TERBUTHYLAZINE 500 SC** plus 2 l/ha simazine 500 SC on soils with less than 15% clay and an application rate of 2.7 l/ha **TERBUTHYLAZINE 500 SC** plus 3 l/ha simazine 500 SC on soils with a clay content of more than 15%.

MAIZE: POST-EMERGENCE

TERBUTHYLAZINE 500 SC can be used post-emergence in maize following a pre- emergence application of a grass-killer to control emerging broadleaf weeds. The broadleaf weeds should not exceed the 4 leaf stage or be >10 cm tall. When the maize is taller than 40 cm a directed spray should be applied to ensure proper coverage of the weeds.

Apply 2,0 l **TERBUTHYLAZINE 500 SC** per hectare together with 250 ml of TROOPER SL® or GALAXY 320 SL (containing 240 g/l 2,4-D + 80g/l Dicamba) as a tank-mix in conjunction with a suitable registered adjuvant. Consult the TROOPER SL® or GALAXY 320 SL label for full details.

Weeds controlled

The following weeds are normally controlled at the dosage rate as indicated above	
A thunbergii Amaranthus hybridus Amaranthus deflexus Bidens bipinnata Bidens pilosa Chenopodium album Chenopodium carinatum Cleome monophylla Cleome rubella Crotalaria sphaeroarpa Datura ferox Datura stramonium Digitaria sanguinalis Echinochloa colona Eleusine Indica Galinsoga parviflora Ipomoea purpurea Schkuhria pinnata Tagetes minuta Tribulus terrestris Xanthium strumarium	Red pigweed common pigweed Perennial pigweed Spanish blackjack blackjack white goosefoot green goosefoot Spindropod Pretty lady Mealie crotalaria Large thorn apple Thorn apple Crab fingergrass Marsh grass Goose grass galant soldier wild gooseberry dwarf marigold khaki weed Dubbeltsje Cocklebur

Notes:

Where planned follow up crops are known to be sensitive to triazines then **TERBUTHYLAZINE 500 SC** may be applied at a reduced rate of 1,5 l per hectare in a tank mix with TROOPER SL® OR GALAXY 320 SL OR GALAXY 320 SL (containing 240 g/l 2,4-D + 80g/l Dicamba) at 350 ml per hectare plus an appropriate adjuvant. This will ensure that the total quantity of Triazines does not exceed 1kg active per hectare during one season when applied subsequent to a pre-emergence program of acetanilides and triazines. Consult the TROOPER SL® or GALAXY 320 SL label for full details.

Waiting periods for follow up crops:

1. Grain sorghum and maize - none.
2. Potatoes, dry beans, ground nuts, small grain, soya beans and sunflower - 9 months.
3. All other crops - 18 months

POST-EMERGENCE WITH AMAZING 480 SC FOR THE CONTROL OF BROADLEAF WEEDS

Do not exceed a total of 1.5 l per hectare of Terbuthylazine if follow up crops, sensitive to triazines, are to be planted the next season.

Post-emergence application of **TERBUTHYLAZINE 500 SC** plus Amazing 480 SC (L9725).

Product	Dosage rates
TERBUTHYLAZINE 500 SC PLUS Amazing 480 SC (L9725) PLUS Any suitable adjuvant	1,0 l 260 ml 0.1%

WEEDS CONTROLLED

The following weeds are normally controlled at the dosage rate as indicated above

Broadleaf weeds

Above plus:	
<i>Acanthospermum australe</i>	Eight-seeded prostrate starbur
<i>Acanthospermum glabratum</i>	five-seeded prostrate starbur
<i>Commelinia benghalensis</i>	Bengal wandering Jew
<i>Digitaria sanguinalis</i>	Crab fingergrass
<i>Gisekia pharnaceoides</i>	Gisekia
<i>Hibiscus trionum</i>	Bladderweed
<i>Hibiscus cannabinus</i>	Kenaf
<i>Nicandra physaloides</i>	Apple of Peru
<i>Oenothera stricta</i>	Evening primrose
<i>Physalis angulata</i>	wild gooseberry
<i>Portulaca oleracea</i>	puslane
<i>Urochloa panicoides</i>	Herringbone grass
<i>Richardia brasiliensis</i>	Tropical Richardia
<i>Vigna vexillata</i>	Wild cow-pea

Notes

- Apply post-emergence in the 2 to 6 leaf stage for broadleaf weeds, and 2 to 3 leaf stage for grass weeds.
- Use the higher dosage rates for difficult to control weeds or high weed pressure situations.
- Refer to the **Amazing 480 SC (L9725)** label for list of additional weeds controlled, as well as **USE RESTRICTIONS** and **DIRECTIONS FOR USE**.

INDUSTRIAL USE:

SITE OF APPLICATION	DOSAGE	REMARKS
Along roads, railway lines and on industrial sites	8 to 20 l/ha	Dosage depends on the clay content of the soil and the duration of control required. Use in combination with the required, registered rate of glyphosate, as indicated on the glyphosate product label. TERBUTHYLAZINE 500 SC can be mixed with simazine 500 SC to increase the residual effect on grasses.

WAARSKUWINGS:

Gevaarstellings: Kan skadelik wees indien ingesluk. Kan skadelik wees in kontak met die vel. Giftig indien ingesasm. Mag skade aan organe veroorsaak deur langdurige of herhaalde blootstelling. Baie giftig vir waterlewe met langdurige effekte.

- **Herbetreding:** Moet nie behandelde gebied betree vir 1 dag na die bespuiting nie, tensy beskermende oorklere gedra word.
- **Ingeval van vergiftiging, ontbied 'n geneesheer en maak die etiket aan hom/haar beskikbaar.**

Lugtoediening: Stel al die bewoners in die onmiddellike omgewing van die gebied wat bespuit gaan word in kennis en reik die nodige waarskuwings uit. Moet nie oor aangrensende gebiede of water spuit of die sputinewel toelaat om dit te besoedel nie.

Alhoewel hierdie middel omvattend onder 'n groot verskeidenheid toestande getoets is waarborg die registrasiehouer nie dat dit onder alle toestande doeltreffend sal wees nie aangesien die werking en effek daarvan beïnvloed kan word deur faktore soos abnormale grond-, klimaats- en bergingstoestande, kwaliteit van verdunningswater, verenigbaarheid met ander stowwe wat nie op die etiket aangedui is nie en die voorkoms van weerstand van onkruidte wat die betrokke middel sowel as die metode, tyd en akkuraatteid van toediening. Verder aanvaar die registrasiehouer nie verantwoordelikheid vir skade aan gewasse, plantegroei, die omgewing of vir nadelige effek op mens of dier of vir 'n gebrek aan prestasie van die betrokke middel as gevolg van die versuum van die gebruiker om etiketaanwyssings na te kom as gevolg van die ontstaan van toestande wat nie kragtens die registrasie voorsien kon word nie. Raadpleeg die verskaffer in die geval van enige onsekerheid.

VOORSORGMAATREËLS:

Voorsorgstellings

Voorkoming: Moenie dampe inasem nie, spuit. Gebruik slegs buite of in 'n goed geventileerde area. Verminder vrylating na die omgewing.

Reaksie: INDIEN INGEESAEM: Verwyder persoon na vars lug en hou gemaklik om asem te haal. Bel 'n gesentrum of dokter as jy onwel voel. Kry mediese advies/aandag as jy onwel voel. Versamel mors.

Berging: Berg in 'n goed geventileerde plek. Hou die houer dig toe. Stoor toegesluif.

Wegdoening: Gooi inhoud en houer weg na 'n goedgekeurde afvalverwyderingsaanleg.

- Voorkom inaseming van sputinewel.
- Dra oogbeskerming en handskoene wanneer konsentraat hanteer word.
- Was met seep en water na gebruik was ook besoedelde klere.
- Moet nie eet, drink of rook tydens vermenging of toediening van die produk of voordat die hande en gesig gewas is nie.
- Verminder sputinewel op ander gewasse, weivelde, riviere, damme en plekke wat nie behandel moet word nie.
- Maak toedieningsapparaat skoon na gebruik. Uitspoelwater moet nie gewasse, weivelde, riviere en damme besoedel nie.

SPOEL die leë houer DRIEKEER UIT soos volg: Keer die leë houer om oor die sput- of mengtenken en dreineer vir ten minste 30 sekondes nadat die vloeistof drup verlangsaam het. Spoel die leë houer daarna drie keer agtereenvolgens uit met een kwart van die houervolume vars water en gooi die spoelwater in die sput- of mengtenk. Prik die drievoudig uitgespolde houer deur en gooi weg via 'n goedgekeurde versamelaar of herwinnek (www.croplife.co.za). Moenie die houer begrave, verbrand of skenk aan enige ander partye wat dit as 'n houer vir kos of drank kan gebruik nie. Moet nooit die leë houer vir enige ander doel hergebruik nie.

Moet nooit die leë houer vir enige ander doel hergebruik nie.

Voorkom besoedeling van voedsel, voer, drinkwater en eetgerei.

RELEVANTE STOWWE:

NAAM	PRODUK IDENTIFISEERDER
Terbutilasien TS	CAS-No.: 5915-41-3
Mono-etileenglikol	CAS-No.: 107-21-1

WEERSTANDSWAARSKUWING: TERBUTHYLAZINE 500 SC is 'n groepkode 5 onkruiddoder. Enige populasie van 'n spesifieke onkruid mag individue insluit wat 'n natuurlike weerstand teen TERBUTHYLAZINE 500 SC van enige ander groepkode 5 onkruiddoders het. Indien hierdie onkruiddoders herhaaldelik aangewend word, kan die weerstandbiedende individue uiteindelik die onkruidpopulasie oorheers. Hierdie weerstandbiedende onkruidte sal waarskynlik nie deur TERBUTHYLAZINE 500 SC van enige ander groepkode 5 onkruiddoder beheer word nie.

Om weerstand teen onkruiddoders te vertraag:

• Vermy die eksklusiewe herhaaldelike gebruik van onkruiddoders met dieselfde groepkode. Wissel af met, of gebruik tenkmengsels van produkte in verskillende onkruiddodergroepkodes.

• Integreer ander beheermaatreels (chemies, verbouing, biologies) in onkruiddoderprogramme.

Vir spesifieke inligting oor weerstandsbestuur kontak die registrasiehouer van hierdie produk.

WYSE VAN AKSIE:

Selektiewe sistemiese onkruiddoder, hoofsaaklik geabsorbeer deur wortels, maar ook deur blare, akropetaal getranslokeer in die xileem en ophoop in die apikale meristeme en blare.

GEBRUIKSBEPERKINGS:

- Moet TERBUTHYLAZINE 500 SC nie op peer-en steenvrugtberome toedien nie.
- Moet TERBUTHYLAZINE 500 SC nie op appelbome, wingerde en sitrus binne een jaar na uitplant toedien nie. Voorkom die behandeling van jong inplantings in gevrestige wingerde en boorde.
- Moet TERBUTHYLAZINE 500 SC nie toedien op appelbome, wingerde en sitrusbome wat aan 'n spoorelementekort onderhewig is of op brakgronde groei nie.
- MOET TERBUTHYLAZINE 500 SC NIE TOEDIEN OP ALKALIESE GRONDE EN/OF VLAK GRONDE WAT AAN VERSUIPING ONDERHEWIG IS NIE.
- TERBUTHYLAZINE 500 SC het 'n relatiewe lang nawerking in die grond en gevoelige gewasse soos groentegewasse, peulplante en wintergraan moet nie geplant word op gronde wat minder as 18 maande vantevore met TERBUTHYLAZINE 500 SC behandel is nie.
- Indien TERBUTHYLAZINE 500 SC in 'n tenkmengsel met glyphosate, simasien of enige ander formulasesies of enige ander onkruiddoder gebruik word, moet die gebruiksbeperkings van sulke middels in ag geneem word.

ONKRUIDE WAT BEHEER WORD: Die volgende onkruide word normaalweg deur TERBUTHYLAZINE 500 SC beheer teen die toedieningshoeveelhede en omgewingstoestande soos hieronder aangedui:

<i>Acanthospermum australe</i>	Agtsadige kruipsterklits
<i>Acanthospermum glabratum</i>	Vyfsadige kruisterklits
<i>Amaranthus hybridus</i>	Gewone misbredie
<i>Amaranthus thunbergii</i>	Rooimisbredie
<i>Amaranthus deflexus</i>	Meerjarige misbredie
<i>Amaranthus spinosus</i>	Doringmisbredie
<i>Bidens bipinnata</i>	Spaanse knapsekerel
<i>Bidens pilosa</i>	Knapsekerel
<i>Chenopodium album</i>	Withondebossie
<i>Chenopodium carinatum</i>	Groenbondebossie
<i>Cleome monophylla</i>	Enkelblaar cleome
<i>Cleome rubella</i>	Mooihoolentjie
<i>Commelinia benghalensis</i>	Bengaalse wandelende Jood
<i>Crotalaria sphaerocarpa</i>	Mielie Crotalaria
<i>Datura rerox</i>	Grootstinkblaar
<i>Datura stramonium</i>	Olieboom
<i>Digitaria sanguinalis</i>	Kruisvingergras
<i>Echinochloa colona</i>	Kleinwatergras
<i>Eleusine Indica</i>	Jonggras
<i>Galinsoga parviflora</i>	Knopkruid
<i>Gisekuia pharmaceoidea</i>	Gisekia
<i>Ipomoea purpurea</i>	Purperwind
<i>Hibiscus trionum</i>	Terblansbosse
<i>Hibiscus cannabinus</i>	Wildestokros
<i>Nicandra physaloides</i>	Basterappellefie
<i>Oenothera stricta</i>	Nagblom
<i>Physalis angulata</i>	Wilde-appellefie
<i>Portulaca oleracea</i>	Porslein
<i>Urochloa panicoides</i>	Beesgras
<i>Richardia brasiliensis</i>	Meksikaanse Richardia
<i>Schkuhria pinnata</i>	Kleinakkiebos
<i>Tagetes minuta</i>	Kakiebos
<i>Vigna vexillata</i>	Wilde koei-ertjie
<i>Xanthium strumarium</i>	Kankerroos

TERBUTHYLAZINE 500 SC beheer nie gevestigde onkruid of onkruid wat deur ondergrondse vegetatiewe organe soos wortelstokke voortplant nie. Graad van beheer en lengte van nawerking hang af van onkruidspesie, onkruidgrootte, groeitoestande tydens en na bespuiting, reenval en organiese materie inhoud van die grond.

GEBRUIKSAANWYSINGS: (GEBRUIK SLEGS SOOS AANGEDUI)

VERENIGBAARHEID:

TERBUTHYLAZINE 500 SC is verenigbaar met glifosaat en Simasien. Die verenigbaarheid van **TERBUTHYLAZINE 500 SC** met ander produkte kan egter beïnvloed word deur die formulering van die betrokke produktes asook deur die kwaliteit van die water. Aangesien die formulering van ander produktes kan verander sonder dat medewet van die registrasiehouer en die kwaliteit van die water ook van plaas tot plaas kan verskil kan die registrasiehouer geen verantwoordelikheid aanvaar vir die verenigbaarheid van **TERBUTHYLAZINE 500 SC** met ander produktes nie. Gevolglik word aanbeveel dat 'n verenigbaarheidstoets uitgevoer word voordat gespuit word.

MENGINSTRUKSIES:

Skuk goed voor gebruik. Plaas skroefdop terug na gebruik.

Maak die spuitpunt halfvol met water en skakel die roerde aan. Voeg die benodigde hoeveelheid **TERBUTHYLAZINE 500 SC** deur 'n 50 maas sif by. Vul die tenk verder met water totdat die verlengde volume verkry is. Maak seker dat die mengsel aanhoudend deeglik geroer word tydens vulling. Wanneer **TERBUTHYLAZINE 500 SC** in tenkmengsels met glifosaat gebruik word, moet **TERBUTHYLAZINE 500 SC** laaste in die spuittenk gevog word.

Maak seker dat die mengsel deeglik geroer word tydens vulling en toediening.

TOEDIENING:

TERBUTHYLAZINE 500 SC kan met enige medium - of hoevolume spuitapparaat wat oor 'n doeltreffende roemeganisme beskik, toegedien word. Daar moet toegesien word dat die onkruiddoder eweredig oor die teikengebied toegedien word. Die beste resultate word normaalweg verkry deur gebruik te maak van platwaaierspuitpunte en 'n spuitvolume van minstens 200 l per hektaar. **TERBUTHYLAZINE 500 SC** word hoofsaaklik deur die wortels van onkruidsaailinge opgeneem en dit het min of geen effek op gevestigde onkruid. Waar onkruid reeds opgekom het moet hierdie onkruid eers vernietig word deur 'n skofselbewerking of deur middel van die toediening van 'n geskikte na-opkoms onkruiddoder. Waar sodanige onkruid nog relatief klein of slegs in 'n yl stand teenwoordig is kan **TERBUTHYLAZINE 500 SC** met die na-opkomonkruiddoder in tenkmengsel toegedien word (mits dit verenigbaar is) om sodoende toedieningskoste te bespaar.

Waar die onkruid alreeds 'n digte stand bereik het kan dit verhoed dat **TERBUTHYLAZINE 500 SC** deurdring tot op die grond en moet hierdie onkruid eers met die na-opkom onkruiddoder gedood word Alvorens **TERBUTHYLAZINE 500 SC** toegedien word.

LANDBOUGEBRUIK:

GWASSE: APPELS, WINGERDE EN SITRUS – TOEDIENINGSHOEVEELHEDE:

GEWAS	TERBUTHYLAZINE 500 SC l/ha	TOEDIENINGSTYD
Droelandwingerd en Besproeide bosstokwingerd	3.5 l/ha	Voor bot
Besproeide opleiwingerd	3.5 l/ha	Vroeë lente
Appels	3.5 l/ha	Gedurende lente
Situs	3.5 l/ha	Gedurende lente

Indien slegs stoke bespuit word moet dienooreenkomsig minder **TERBUTHYLAZINE 500 SC** / ha toegedien word. Raadpleeg die naaste Tegniese Verteenwoordiger van die Verskaffer Maatskappy.

TERBUTHYLAZINE 500 SC kan gemeng word met Simasien in appels, sitrus en wingerd om die residuale effek op grasse te verbeter. Gebruik 'n toedieningshoeveelheid van 2.7 l/ha **TERBUTHYLAZINE 500 SC** plus 2 l/ha Simasien op gronde met minder as 15% klei en 2.7 l/ha Terbutielasien plus 3 l/ha Simasien op gronde met 'n kleiinhoud van meer as 15%.

MIELIES: NA-OPKOMS:

TERBUTHYLAZINE 500 SC kan na-opkoms in mielies gebruik word as ovolg na 'n voor-opkoms toediening van 'n grasdoder om ontkiemende breeblaar onkruid te beheer. Die breeblaar onkruid behoort nie 4 blaar stadium te oorskry of >10 cm hoog wees nie. Wanneer die mielies hoer as 40 cm is moet 'n gerigte toediening gedoen word om behoorlike bedekking van die onkruid te verseker.

Dien 2,0 l **TERBUTHYLAZINE 500 SC** per hektaar toe tesame met 250 ml TROOPER SL of GALAXY 320 SL (bevattende 240 g/l 2,4-D + 80g/l Dikamba) as 'n

tenkmengsel in verbinding met 'n gesikte geregistreerde bymiddel. Raadpleeg die TROOPER SL of GALAXY 320 SL etiket vir volledige aanwysings.

Onkruid beheer:

Die volgende onkruide word normaalweg beheer teen die dosis soos aangedui hierbo.

A thunbergii	Rooi misbredie
Amaranthus hybridus	Gewone misbredie
Amaranthus deflexus	Meerjarige misbredie
Bidens bipinnata	Spaanse knapserel
Bidens pilosa	Knapserel
Chenopodium album	withondebosse
Chenopodium carinatum	groenhondebosse
Cleome monophyla	enkelblaar cleome
Cleome rubella	mooienootjtie
Crotalaria sphaeroarpa	Mielie ctrotalaria
Datura ferox	grootstinkblaar
Datura stramonium	olieboom
Digitaria sanguinalis	kruisvingergras
Echinochloa colonia	kleinwatergras
Eleusine Indica	jongosgras
Galinsoga parviflora	knopkruid
Ipomoea purpurea	purperwind
Schkuhria pinnata	kleinkakiebos
Tagetes minuta	kakiebos
Tribulus terrestris	Dubbeltjie
Xanthium strumarium	kankerroos

Notas: Waar beplante opvolg gewasse bekend is om sensitief te wees tot triazines dan kan **TERBUTHYLAZINE 500 SC** toegedien word teen 'n verminderde dosis van 1,5 l per hektaar in 'n tenkmengsel met TROOPER SLR of GALAXY 320 SL (bevat 240 g/l 2,4-D + 80g/l Dikamba) teen 350 ml per hektaar plus 'n gepaste bymiddel. Dit sal verseker dat die totale hoeveelheid triazines nie 1kg aktief per hektaar oorskry gedurende een seisoen nie wanneer toegedien word na 'n voor-opkoms program van acetanilides en triazines. Raadpleeg die TROOPER SLR of GALAXY 320 SL etiket vir volledige besonderhede.

Wag periodes vir opvolg gewasse:

1. Graan sorghum en mielies - geen.
2. Aartappels, droe bone, grondboontjies, klein graan, soya bone and sonneblom - 9 maande.
3. Alle ander gewasse - 18 maande

NA-OPKOMS MET AMAZING 480 SC VIR DIE BEHEER VAN BREËBLAAR ONKRUIDE:

Moenie totaal van 1,5 l per hektaar Terbutylazine oorskry indien opvolg gewasse wat sensitief is tot triazines, geplant gaan word die volgende seisoenare. Na-opkoms toediening van **TERBUTHYLAZINE 500 SC** plus Amazing 480 SC (L9725).

PRODUK	DOSISSE
TERBUTHYLAZINE 500 SC	1,0 l
PLUS	
Amazing 480 SC (L9725)	260 ml
PLUS	
Enige gesikte bymiddel	0,1%

ONKRUIDE BEHEER:

Die volgend onkruide word normaalweg beheer teen die dosis soos aangedui hierbo:

BREEBLAAR ONKRUIDE:

Bogenoemde plus:

- Acanthospermum australe*
- Acanthospermum glabratum*
- Commelina benghalensis*
- Digitaria sanguinalis*
- Giseckia pharnaceoides*
- Hibiscus trionum*
- Hibiscus cannabinus*
- Nicandra physaloides*
- Oenothera stricta*
- Physalis angulata*
- Portulaca oleracea*
- Urochloa panicoides*
- Richardia brasiliensis*
- Vigna vexillata*

- Agtsadige kruipsterklits
- Vyfsadige kruipsterklits
- Bengaalse wandelende Jood
kruisvingergras
- Gisekia
- Terblansbossie
- wildestokroos
- basterappellifie
- nagblom
- wilde-appellifie
- porslein
- beesgras
- Meksikaanse Richardia
- Wilde koei-ertjie

Notas:

- Dien na-opkoms toe in die 2 tot 6 blaar stadium vir breeblaar onkruide, en 2 tot 3 leaf stadium vir gras onkruide.
- Gebruik die hoer dosisse vir moeilik beheerbare onkruide of hoeonkruid druk situasies.
- Werwys na die Amazing 480 SC (L9725) etiket vir lys van bykomende onkruide beheer, sowel as GEBRUIKSBEPERKINGS en GEBRUIKSAANWYSINGS.

INDUSTRIËLE GEBRUIK:

PLEK VAN TOEDIENING	DOSIS	OPMERKINGS
Langs paaie, spoorbane en op nywerheidsperselle	8 tot 20 l/ha	Toedieningshoeveelhede hang van die klei inhoud van die grond en die residuale beheer wat verlang word af. Gebruik in kombinasie met die verlange, geregistreerde hoeveelheid glifosaat soos op die glifosaat produksetiket aangedui. TERBUTHYLAZINE 500 SC kan gemeng word met Simasien om die residuele effek op grasse te verbeter

TERBUTHYLAZINE 500 SC

HERBICIDE

**READ THE LABEL AND ATTACHED PACKAGED LEAFLET BEFORE USE
KEEP OUT OF REACH OF CHILDREN AND ANIMALS**

HRAC HERBICIDE GROUP CODE:

5

HRAC ONKRUIDDODERGROEP KODE:

A pre-emergence suspension concentrate herbicide for the control of a broad spectrum of annual weeds in apples, vines and citrus and post-emergence control of broadleaf weeds in maize as well as for the prevention of weed growth on industrial sites and other non-crop areas.

'n Voor-opkoms suspensie konsentraat onkruiddoder vir die beheer van 'n breë spektrum eenjarige onkruike in appels, wingerd en sitrus sowel as vir die na-opkoms beheer van breëblaarkruide in mielies en die voorkoming van onkruidgroei op industrieële gebiede en grond wat nie vir landbou gebruik word nie.

ACTIVE INGREDIENT/AKTIWE BESTANDDEEL:

Terbutylazine/ (triazine) 488 g/l Terbutilasien (triasien)
Other triazines 12 g/l Ander triasiene

Hazard Statements:

May be harmful if swallowed.
May be harmful in contact with skin.
Toxic if inhaled.
May cause damage to organs through prolonged or repeated exposure.
Very toxic to aquatic life with long lasting effects.

Precautionary Statements:

Do not breathe vapours, spray.
IF INHALED: Remove person to fresh air and keep comfortable for breathing.
Call a poison center or doctor if you feel unwell.
