

ARTEMIS 750 WG

Reg. No. / Nr L11612 Act No. 36 of 1947/ Wet Nr 36 van 1947

HERBICIDE

**READ THE LABEL AND ATTACHED PACKAGED LEAFLET BEFORE USE
KEEP OUT OF REACH OF CHILDREN AND ANIMALS**

HERBICIDE GROUP CODE

2

ONKRUIJDDODER GROEPKODE

A water dispersible granule, selective post-emergence grass and broadleaf herbicide for the control of grasses, sorghum species and broadleaf weeds in maize.

'n Water dispergeerbare korrelonkruiddoder vir die selektiewe beheer van sekere na-opkoms grasse, sorghum spesies en breëblaaronkruide in mielies.

ACTIVE INGREDIENT/AKTIEWE BESTANDDEEL:

nicosulfuron (sulfonyl urea).....750g/kg.....nicosulfuron (sulfonylureum)

WARNING

Hazard Statements:

Causes skin irritation.

Causes serious eye irritation.

Very toxic to aquatic life.

Precautionary Statements:

IF ON SKIN: Wash with plenty of soap and water.

IF IN EYES: Rinse cautiously with water for several minutes.

Remove contact lenses, if present and easy to do. Continue rinsing.

If skin irritation occurs: Get medical advice/attention.

If eye irritation persists: Get medical advice/attention.

WARNINGS

Hazard Statements:

Causes skin irritation. Causes serious eye irritation. Very toxic to aquatic life.

Pre-Harvest Interval (PHI):

Withholding period: Allow a minimum of **60 days** between application and harvest of maize.

- Handle with care.
- Do not contaminate dams, lakes, rivers or any other body of water.
- Store in a cool, dry place away from food and feedstuff.
- Keep out of reach of children, uninformed persons and animals.
- Damage to the crop may occur should the recommended dosage rate at the recommended time of application be exceeded.
- **Re-entry intervals:** Do not enter treated area within 1 day of application unless wearing protective clothing.

Although this remedy has been extensively tested under a large variety of conditions, the registration holder does not guarantee that it will be effective under all conditions. The activity and effect thereof may be affected by factors such as abnormal soil, climatic and storage conditions, quality of dilution water, compatibility with other substances not indicated on the label and the occurrence of resistance of the pests against the remedy as well as by the method, time and accuracy of application. The registration holder furthermore does not accept responsibility for damage to crops, vegetation, the environment or harm to man or animal or for lack of performance of the remedy concerned due to failure by the user to follow the label instructions, or to the occurrence of conditions which could not have been foreseen in terms of the registration. Consult the supplier in the event of any uncertainty.

PRECAUTIONS

Precautionary Statements

General: If medical advice is needed, have product container or label at hand. Keep out of reach of children. Read carefully and follow all instructions.

Prevention: Wash hands, forearms and face thoroughly after handling. Avoid release to the environment. Wear protective clothing, eye protection, face protection.

Response: IF ON SKIN: Wash with plenty of soap and water. IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If skin irritation occurs: Get medical advice/attention. If eye irritation persists: Get medical advice/attention. Take off contaminated clothing and wash it before reuse. Collect spillage.

Disposal: Dispose of contents and container to an approved waste disposal plant.

- Do not eat, drink or smoke whilst mixing or applying the product, or before washing hands and face and a change of clothing.
- Avoid spray drift on to susceptible or edible crops, grazing, rivers, dams and areas not under treatment.
- **Cleaning of Application Equipment:** Special attention and care must be taken with cleaning of all equipment used in the mixing and application of **ARTEMIS 750 WG**, before using it for applications in other crops:
 1. Drain the spray tank and rinse thoroughly with ample water. Flush the pipes, boom and nozzles of applicator with the water.
 2. Drain the spray tank again and fill with clean water.
 3. Add household ammonia to water in the spray tank (1 litre for every 100 litres water) or 1 litre sodium hypochlorite (4.5 %) per 200 litres water.
 4. Bleed the system to ensure that all pipes, booms and nozzles are filled with the ammonia solution.
 5. Leave the ammonia solution in the applicator for at least one hour.
 6. Drain the spray tank and pipe system completely.
 7. **Repeat steps 2 to 6.**
 8. Remove ammonia residues by flushing the system thoroughly with clean water.
 9. Dispose of the rinse water in a responsible manner.

RELEVANT SUBSTANCES:

NAME	PRODUCT IDENTIFIER
Nicosulfuron TC	CAS-No.: 111991-09-4
Morwet D-425 Powder (Naphthalenesulfonic acid, polymer with formaldehyde, sodium salt)	CAS-No.: 9084-06-4
Morwet EFW (sodium alkyl naphthalene sulfonate blend)	CAS-No.: 105864-15-1

RESISTANCE WARNING

For resistance management **ARTEMIS 750 WG** is a HRAC Group Code 2 herbicide. Any weed population may contain individuals naturally resistant to **ARTEMIS 750 WG** and other Group Code 2 herbicides. The resistant individuals can eventually dominate the weed population if these herbicides are used repeatedly. These resistant weeds might not be controlled by **ARTEMIS 750 WG** or other Group Code 2 herbicides.

To delay the development of herbicide resistance the following should be done:

- Avoid exclusive and repeated use of herbicides from the same herbicide Group Code. Alternate or tank mix with products from different herbicide groups.
- For tank mixing or alternation with products from another herbicide group, refer to applicable individual product labels
- Where possible, integrate other control methods (chemical, cultural and biological) into weed control programs.

For specific information contact the local distributor agent or the registration holder.

MODE OF ACTION

Selective, systemic herbicide, absorbed by foliage and roots, translocated in xylem and phloem to meristematic tissues.

USE RESTRICTIONS

- The use of **ARTEMIS 750 WG** under certain climatic conditions (e.g. a lengthy wet and cold period) or if such conditions prevail soon after application, temporary yellowing or stunting of the crop may occur.
- Certain cultivars are more susceptible to yellowing and stunting than others and a representative of the relevant seed company should be consulted before planting a field where **ARTEMIS 750 WG** is to be used.
- Do not apply on Sweetcorn, Popcorn or seed maize.
- Do not apply **ARTEMIS 750 WG** in combination with an organophosphate insecticide or within 14 days of an organophosphate application.
- Do not use **ARTEMIS 750 WG** following in-furrow applications of organophosphate granular insecticides, e.g. Terbufos and Phorate.
- The two restrictions mentioned above do not apply to carbamate insecticides. For further information consult the registration holder of this product.
- Follow-up crops: The amount of **ARTEMIS 750 WG** residues remaining in the soil depends on the rate applied, soil pH, organic matter content, time lapsed, climatic and weather conditions since the **ARTEMIS 750 WG** application.

MINIMUM RE-PLANTING INTERVAL

Soil pH below 7.0		Soil pH above 7.0	
Crop	Months	Crop	Months
Maize	0	Maize	0
Cereals (Wheat, Barley, Oats), Soy beans, Dry beans & Sunflowers	8	Cereals (Wheat, Barley, Oats), Soy beans, Dry beans & Sunflowers	12
Sorghum and all other crops	12	Sorghum and all other crops	24

- **ARTEMIS 750 WG** has a limited residual effect on germinating weeds, the control of which is affected by factors such as weed species, soil pH and soil moisture.
- Under no circumstances must unused spray mixture be kept overnight.
- Do not apply **ARTEMIS 750 WG** to maize growing under stressed conditions such as water logging, drought, disease, insect damage or mineral element deficiencies (especially nitrogen).
- For spraying purposes, only use water that has the same quality as that suitable for overhead irrigation.

DIRECTIONS FOR USE: Use only as directed.

COMPATIBILITY:

ARTEMIS 750 WG is compatible with Amazing 480 SC (L 9725), Farmazine Super 600 SC (L 7537), Buccaneer 960 EC (L 9424), Farmag Acetochlor 900 EC (L 9019), Terbutylazine 500 SC (L 9328) and a registered adjuvant (wetter/spreader/penetrant).

When **ARTEMIS 750 WG** is used in conjunction with any other agricultural remedy; adhere to all **WARNINGS, PRECAUTIONS and DIRECTIONS FOR USE** mentioned on that label.

General Application Conditions:

- **ARTEMIS 750 WG** must be applied after emergence of both the crop and the weeds.
- Only prepare sufficient spray mixture for immediate use.

Mixing instructions:

Pre-mixing:

- Pre-mix the required amount of **ARTEMIS 750 WG** in a small amount of water to obtain a "smooth cream" without any remaining granules.

Mixing:

- Half fill the spray tank with clean water.
- Add the pre-mixed, creamed product to the tank through a sieve. Fill the tank to the required final volume with clean water while agitating continuously and then proceed as follows:

High volume (e.g. ground sprayer)

- Add the required amount of adjuvant (wetter/spreader/penetrant) to the spray mixture and wait until the adjuvant is thoroughly mixed, before commencing with application.
- Ensure thorough agitation of the spray mixture at all times.

APPLICATION

Ground Application:

- Apply by means of a tractor mounted boom sprayer, which is correctly calibrated to deliver at least 200 litres of spray mixture per hectare at constant speed and pressure (100 to 200 kPa), to ensure an even distribution and coverage.
- In order to prevent over-application, avoid overlapping of swaths and close the nozzles when starting, moving slowly, turning or stopping.

Drift:

- Avoid spray drift to adjacent crops and all non-target areas.

Adjuvants:

- The use of a suitable registered adjuvant (wetter/spreader/penetrant e.g. Entrée) at the label recommended rate is always recommended.

APPLICATION RATES

CROPS	Soil Type	DOSAGE RATE /HA	REMARKS
MAIZE	All soil types	60 g ARTEMIS 750 WG PLUS an adjuvant (wetter/ spreader/penetrant - at the rate recommended on the relevant label e.g ENTRÉE)	<p>WARNING Refer to antagonism restriction with organophosphate insecticides under "USE RESTRICTIONS" above.</p> <p>Apply as a post-emergence application over the top of the maize. Apply when the crop is in the 2- to 6-leaf stage and after emergence of the weeds. Use drop-arms to direct the spray in-between the rows.</p> <ul style="list-style-type: none"> • Apply when weeds are actively growing and do not exceed the optimum growth stages indicated below. • Only apply a late second application at 7- to 10-leaf crop stage with drop arm nozzles (directed spray) in order to avoid spraying directly into plant funnel and to ensure that the weeds are not shielded from the spray by the crop's leaves. • Cultivation subsequent to application of ARTEMIS 750 WG may lead to re-growth of rhizomes.

WEEDS NORMALLY CONTROLLED: from seedling (1 to 2 leaves) up to the stage indicated.

Botanical name	Common name	Maximum size of weeds at time of application
Grasses:		
<i>Panicum schinzii</i>	Sweet buffalo grass	Up to tillering stage
<i>Rottboellia cochinchinensis</i>	Itch grass or guinea-fowl grass	Up to 4 leaves
<i>Setaria pumila</i>	Yellow bristle grass	Up to 4 leaves
Broadleaf weeds:		
<i>Amaranthus thunbergii</i>	Red pigweed	4 leaves
<i>Amaranthus deflexus</i>	Perennial pigweed	4 leaves
<i>Cleome monophylla</i>	Single-leaved cleome	6 leaves
<i>Datura stramonium</i>	Common thorn apple	4 leaves
<i>Schkukhria pinnata</i>	Dwarf marigold	3 leaves
<i>Tagetes minuta</i>	Tall khaki weed	4 leaves
<i>Tribulus terrestris</i>	Devil's thorn	4 leaves
Sorghum species:		
<i>Sorghum bicolor</i>	Common wild sorghum	Up to 7 leaves
<i>Sorghum halepense</i>	Johnson grass	Up to 7 leaves

Post-emergence application of ARTEMIS 750 WG plus Amazing 480 SC plus a registered adjuvant (wetter/spreader/penetrant e.g. ENTRÉE) on maize:

NOTES:

- Re-growth from established grass tufts will not be controlled.
- Use **drop-arm** nozzles to direct application in between rows. This mixture cannot be applied by an aerial application.
- Refer to the **AMAZING 480 SC** label for a complete list of weeds controlled by **AMAZING 480 SC**.
- Adhere to all **USE RESTRICTIONS** and **DIRECTIONS FOR USE** as indicated on the **AMAZING 480 SC** label.

WEEDS NORMALLY CONTROLLED: from seedling (1 to 2 leaves) up to the stage indicated.

ARTEMIS 750 WG 60 g / ha	PLUS AMAZING 480 SC 260 mL / ha	
	PLUS Suitable, registered adjuvant e.g. ENTRÉE

Post-emergence application of ARTEMIS 750 WG plus AMAZING 480 SC plus a registered adjuvant (wetter/spreader/penetrant e.g. ENTRÉE) for control of *Sorghum* species and certain broadleaf weeds in maize:

NOTES

- This treatment can be applied as a stand-alone post-emergence application or as a follow up to a pre-emergence application of **Amazing 480 SC** in tank mixture with **Farmag Metolachlor 915 S** as indicated on the registered labels.
- **Buccaneer 960 EC** or **Farmag Acetochlor 900 EC** can be added at 400 to 800 mL per hectare to this tank mixture for residual control of grass weeds.
- A suitable, registered adjuvant (wetter/spreader/penetrant e.g. **ENTRÉE**) at the recommended dosage rate must be used with all post-emergence applications of **ARTEMIS 750 WG** plus **Amazing 480 SC**, as indicated on the registered label.
- Do not apply this mixture aerially.
- Apply with drop-arm nozzles (directed spray) in order to avoid spraying directly into plant funnel and to ensure that the weeds are not shielded from the spray by the crop's leaves.
- Refer to the **Amazing 480 SC** and **Terbutylazine 500 SC** or **Farmazine Super 600 SC** labels for a complete list of weeds controlled by these products.
- Adhere to all **USE RESTRICTIONS** and **DIRECTIONS FOR USE** as indicated on the **Amazing 480 SC** and **Terbutylazine 500 SC** or **Farmazine Super 600 SC** label.

ARTEMIS 750 WDG 60 g / ha + Amazing 480 SC 210 to 260 mL / ha	PLUS Terbutylazine 500 SC 960 mL	OR PLUS Farmazine Super 600 SC 800 mL / ha	PLUS A registered adjuvant (wetter/spreader/ penetrant) at the recommended rate) e.g. ENTRÉE
WEEDS NORMALLY CONTROLLED From seedling (1 to 2 leaves) to stage as indicated.			
Botanical name		Common name	Maximum size of weeds at time of application
Grasses:			
<i>Panicum schinzii</i>	Sweet buffalo grass	Up to tillering stage	
<i>Rottboellia cochinchinensis</i>	Itch grass or guinea-fowl grass	Up to 4 leaves	
<i>Setaria pallide-fusca</i>	Red bristle grass	Up to 4 leaves

Terbuthylazine 500 SC (L 9328), registered by Cedar Falls Properties 130 (Pty) Ltd.

Farmag Metolachlor 915 S (L 7179), registered by Castle Ag-chem (Pty) Ltd.

Farmazine Super 600 SC (L 7537), registered by Castle Ag-chem (Pty) Ltd.

ENTRÉE (L8055) registered by Miller Chemicals / Hygrotech)

WAARSKUWINGS

Gevaarstellings:

Veroorsaak velirritasie. Veroorsaak ernstige oogirritasie. Baie giftig vir waterlewé.

Voor-oes interval (PHI):

Onthoudingsperiode: Laat 'n minimum van 60 dae toe tussen toediening en oes van mielies.

- Hanteer versigtig.
- Moet nie damme, mere, riviere of enige ander watermassa besoedel nie.
- Berg in 'n koel, droë plek weg van voedsel en voer.
- Hou buite bereik van kinders, oningesigte persone en diere.

Skade aan die gewas mag voorkom indien die aanbevolde dosis op die aanbevole tyd van toediening oorskry word.

- **Herbetredingsintervalle:** Moet nie behandelde area binne 1 dag na toediening betree nie, tensy beskermende klere gedra word.

Alhoewel hierdie middel omvattend onder 'n groot verskeidenheid toestande getoets is, waarborg die registrasiehouer nie dat dit onder alle toestande effektiief sal wees nie. Die aktiwiteit en effek daarvan kan beïnvloed word deur faktore soos abnormale grond-, klimaat- en bergingstoestande, kwaliteit van verdunningswater, verenigbaarheid met ander stowwe wat nie op die etiket aangedui word nie en die voorkoms van weerstand van die plae teen die middel asook deur die metode, tyd en akkuraatheid van toediening. Die registrasiehouer aanvaar verder nie verantwoordelikheid vir skade aan gewasse, plantegroei, die omgewing of skade aan mens of dier of vir gebreklike werkverrigting van die betrokke middel as gevolg van die versuim deur die gebruikter om die etiketinstruksies te volg, of die voorkoms van toestande nie. wat nie ingevolge die registrasie voorsien kon word nie. Raadpleeg die verskaffer in die geval van enige onsekerheid.

VOORSORGMAATREËLS

Voorsorgstellings

Algemeen: Indien mediese advies benodig word, hou produkhouer of etiket byderhand. Hou buite bereik van kinders. Lees aandagig deur en volg alle instruksies.

Voorkoming: Was hande, voorarms en gesig deeglik na hantering. Vermy vrylating na die omgewing. Dra beskermende klere, oogbeskerming, gesigbeskerming.

Reaksie: INDIEN OP DIE VEL: Was met baie seep en water. INDIEN IN OË: Spoel versigtig uit met water vir 'n paar minute. Verwyder kontaklense, indien teenwoordig en maklik om te doen. Gaan voort met spoel. Indien velirritasie voorkom: Kry mediese advies/aandag. Indien oogirritasie voortduur: Kry mediese advies/aandag. Trek besoedelde klere uit en was dit voor hergebruik. Versamel gemors.

Wegdoening: Gooi inhoud en houer weg na 'n goedgekeurde afvalverwydersaanleg.

- Moet nie eet, drink of rook tydens vermenging van die produk, of voordat hande en gesig gewas is en klere aangetrek is nie.
- Vermy wegdrywing van sputtnewel na vatbare of eetbare gewasse, weiding, riviere, damme en areas nie onder behandeling nie.
- **Skoonmaak van toedieningstoerusting:** Spesiale aandag en sorg moet geneem word met die skoonmaak van alle toerusting wat gebruik word in die vermenging en toediening van ARTEMIS 750 WG, voordat dit vir toedienings in ander gewasse gebruik word:
 1. Dreineer die sputtentk en spoel deeglik uit met genoeg water. Spoel die pipe, balk en sputtpunte van toedienier met die water.
 2. Dreineer die sputtentk weer en vul met skoon water.
 3. Voeg huishoudelike ammoniak by water in die sputtentk (1 liter vir elke 100 liter water) of 1 liter natriumhipochloriet (4.5 %) per 200 liter water.
 4. Bloei die stelsel om te verseker dat alle pipe, valbalke en sputtpunte met die ammoniakoplossing gevul is.
 5. Laat die ammoniakoplossing vir minstens een uur in die toedienier.
 6. Dreineer die sputtentk en pypstelsel heeltemal.
- 7. **Herhaal stappe 2 tot 6.**
- 8. Verwyder ammoniakreste deur die stelsel deeglik met skoon water te spoel.
- 9. Gooi die spoelwater op 'n verantwoordelike wyse weg.

RELEVANTE STOWWE

NAAM	PRODUK IDENTIFISEERDER
Nicosulfuron TS	CAS-Nr.: 111991-09-4
Morwet D-425 Poeler (naftaleensulfonsuur, polimeer met formaldehied, natriumsout)	CAS-Nr.: 9084-06-4
Morwet EFW (natriumalklein naftaleensulfonaatmengsel)	CAS-Nr.: 105864-15-1

WEERSTANDSWAARSKUWING

Vir weerstandsbestuur is **ARTEMIS 750 WG** 'n HRAC Groepkode 2 onkruiddoder. Enige onkruidpopulasie mag individue bevat wat natuurlik weerstandbiedend is teen **ARTEMIS 750 WG** en ander Groepkode 2 onkruiddodders. Die weerstandbiedende individue kan uiteindelik die onkruidpopulasie oorheers indien hierdie onkruiddoders herhaaldelik gebruik word. Hierdie weerstandbiedende onkruidde sal dalk nie deur **ARTEMIS 750 WG** of ander Groepkode 2 onkruiddodders beheer word nie.

- Om die ontwikkeling van onkruiddoderweerstand te vertraag, moet die volgende gedoen word:
 - Vermind die eksklusieve en herhaalde gebruik van onkruiddodders van dieselfde onkruiddodergroepkode. Wissel af of tenkmengsels met produkte van verskillende onkruiddodergruppe.
 - Vir tenkmenging of awisseling met produkte van 'n ander onkruiddodergruppe, verwys na toepaslike individuele produktikette.
 - Waar moontlik, integreer ander beheermetodes (chemies, verbouing en biologies) in onkruidbeheerprogramme.

Vir spesifieke inligting kontak die plaaslike verspreider agent of die registrasiehouer.

WYSE VAN AKSIE

Selektiewe, sistemiese onkruiddoder, geabsorbeer deur blare en wortels, getranslokeer in xileem en floëem na meristematische weefsels.

GEBRUIKSBEPERKINGS

- Die gebruik van **ARTEMIS 750 WG** onder sekere klimaatstoestande (bv. 'n lang nat en koue periode) of indien sulke toestande kort na toediening heers, kan tydelike vergeling of verdwerging van die gewas voorkom.
- Sekere kultivars is meer vatbaar vir vergeling en verdwerging as ander en 'n verteenwoordiger van die betrokke saadmaatskappy moet geraadpleeg word voordat 'n land geplant word waar **ARTEMIS 750 WG** gebruik gaan word.
- Moet nie op Suikermielies, Springmielies of saadmielies toedien nie.
- Moet nie **ARTEMIS 750 WG** in kombinasie met 'n organofosfaat insekdoder of binne 14 dae na 'n organofosfaat toediening toedien nie.
- Moet nie **ARTEMIS 750 WG** gebruik na in-voer toedienings van organofosfaat korrel insekdodders, bv. Terbufos en Foraat.
- Die twee beperkings hierboven is nie van toepassing op karbamaat insekdodders nie. Raadpleeg die registrasiehouer van hierdie produk vir verdere inligting.
- Upvolgewasse: Die hoeveelheid **ARTEMIS 750 WG**-reste wat in die grond oorby hang af van die dosis toegedien, grond-pH, organiese materiaal-inhoud, tydsverloop, klimaats- en weerstoestande sedert die **ARTEMIS 750 WG** toediening.

MINIMUM HERPLANT-INTERVAL

Grond pH onder 7,0		Grond pH bo 7,0	
Gewas	Maande	Gewas	Maande
Mielies	0	Mielies	0
Graangewasse (koring, gars, hawer), sojabone, droëbone en sonneblomme	8	Graangewasse (koring, gars, hawer), sojabone, droëbone en sonneblomme	12
Sorghum en alle ander gewasse	12	Sorghum en alle ander gewasse	24

- **ARTEMIS 750 WG** het 'n beperkte nawerking op ontkiemende onkruidde, waarvan die beheer beïnvloed word deur faktore soos onkruidspesies, grond pH en grondvog.
- Ongebruikte sputtmengsel moet onder geen omstandighede oornag gehou word nie.
- Moet nie **ARTEMIS 750 WG** toedien op mielies wat onder strestoestande soos versuiping, droogte, siektes, insekskade of mineraalelementekorte (veral stikstof) groei, toedien nie.
- Vir sputtdoeleindes, gebruik slegs water wat dieselfde kwaliteit het as dié wat geskik is vir oorhoofse besproeiing.

GEBRUIKSAANWYSINGS: Gebruik slegs soos aangedui

VERENIGBAARHEID

ARTEMIS 750 WG is verenigbaar met **Amazing 480 SC (L 9725)**, **Farmazine Super 600 SC (L 7537)**, **Buccaneer 960 EC (L 9424)**, **Farmag Acetochlor 900 EC (L 9019)**, **Terbutylazine 500 SC (L 9328)** en 'n geregistreerde byvoegmiddel (benatter/strooier/penetrant).

Wanneer **ARTEMIS 750 WG** saam met enige ander landboumiddel gebruik word; voldoen aan alle **WAARSKUWINGS, VOORSORGMAATREËLS** en **GEBRUIKSAANWYSINGS** wat op daardie etiket genoem word.

Algemene toepassingsvoorwaardes:

- **ARTEMIS 750 WG** moet toegedien word na opkoms van beide die gewas en die onkruid.
- Berei slegs voldoende spuitmengsel voor vir onmiddellike gebruik.

Menginstruksies:**Voer vermenging:**

- Meng vooraf die benodigde hoeveelheid **ARTEMIS 750 WG** in 'n klein hoeveelheid water om 'n "gladde room" te verkry sonder enige oorblywende korrels.

Meng:

- Maak die spuittenk halfvol met skoon water.
- Voeg die voorafgemengde, geroomde produk by die tenk deur 'n sif. Vul die tenk tot die verlangde finale volume met skoon water terwyl aanhoudend geroer word en gaan dan soos volg voort:

Hoë volume (bv. grondspuit):

- Voeg die benodigde hoeveelheid byvoegmiddel (benatter/strooier/penetrant) by die spuitmengsel en wag totdat die byvoegmiddel deeglik gemeng is, voordat met toediening begin word.
- Verseker te alle tyd deeglike roering van die spuitmengsel.

TOEDIENING**Grond Toediening:**

- Dien toe deur middel van 'n trekkergemonteerde balkspuit, wat korrek gekalibreer is om ten minste 200 liter spuitmengsel per hektaar teen konstante spoed en druk (100 tot 200 kPa) te lever, om 'n egale verspreiding en bedekking te verseker.
- Om oortoediening te voorkom, vermy oorvleueling van bane en maak die spuitpunte toe wanneer jy begin, stadig beweeg, draai of stop.

Drywing:

- Vermy wegdrywing van spuitnewel na aangrensende gewasse en alle nie-teiken areas.

Bymiddels:

- Die gebruik van 'n gesikte geregistreerde byvoegmiddel (benatter/strooier/penetrant bv. **Entrée**) teen die etiket aanbevoie dosis word altyd aanbeveel.

TOEDIENINGSHOEVEELHEDE

CROPS	Soil Type	DOSAGE RATE /HA	REMARKS
MIELIES	Alle grondtipies	60 g ARTEMIS 750 WG PLUS 'n byvoegmiddel (benatter/strooier/ penetrant - teen die dosis aanbeveel op die betrokke etiket, bv. ENTRÉE)	WAARSKUWING Verwys na antagonisme beperking met organofosfaat insekdoders onder "GEBRUIKBEPERKINGS" hierbo. Dien toe as 'n na-opkoms toediening oor die bokant van die mielies. Dien toe wanneer die gewas in die 2- tot 6-blaarstadium is en na opkoms van die onkruide. Gebruik valarms om die spuitmiddel tussen die rye in te rig. <ul style="list-style-type: none"> • Dien toe wanneer onkruide aktief groei en moenie die optimum groeistadiums soos hieronder aangedui oorskry nie. • Dien slegs 'n laat tweede toediening op 7- tot 10-blaargewass stadium toe met valarmspuitpunte (gerigte bespuiting) om te verhoed dat direk in plantregter gespuit word en om te verseker dat die onkruid nie deur die gewas se blare van die bespuiting beskerm word nie. • Verbouing na toediening van ARTEMIS 750 WG kan lei tot hergroei van risome.

ONKRUIDE NORMAAL BEHEER: vanaf saailing (1 tot 2 blare) tot die stadium aangedui.

Botaniese naam	Algemene naam	Maksimum grootte van onkruidie ten tye van toediening
Grasse:		
<i>Panicum schinzii</i>	Soetbuffelsgras	Tot by die bewerking stadium
<i>Rottboellia cochinchinensis</i>	Tarentaalgras	Tot 4 blare
<i>Setaria pumila</i>	Rooiborselgras	Tot 4 blare
Breëblaar onkruidie:		
<i>Amaranthus thunbergii</i>	Rooimisbredie	4 blare
<i>Amaranthus deflexus</i>	Meerjarige misbredie	4 blare
<i>Cleome monophylla</i>	Rusperbossie	6 blare
<i>Datura stramonium</i>	Stinkblaar	4 blare
<i>Schkuhria pinnata</i>	Kleinakkiebos	3 blare
<i>Tagetes minuta</i>	Kakiebos	4 blare
<i>Tribulus terrestris</i>	Gewone dubbeltjie	4 blare
Sorghum spesies:		
<i>Sorghum bicolor</i>	Wilde graansorghum	Tot 7 blare
<i>Sorghum halepense</i>	Johnsongras	Tot 7 blare

Na-opkoms toediening van ARTEMIS 750 WG plus Amazing 480 SC plus 'n geregistreerde byvoegmiddel (benatter/strooier/penetrant bv. ENTRÉE) op mielies:

NOTAS:

- Hergroeи van gevestigde grasperle sal nie beheer word nie.
- Gebruik **valarmspuitpunte** om toediening tussen rye te rig. Hierdie mengsel kan nie deur 'n lugtoediening toegedien word nie.
- Verwys na die AMAZING 480 SC etiket vir 'n volledige lys van onkruidie wat deur AMAZING 480 SC beheer word.
- Voldoen aan alle GEBRUIKSBEPERKINGS en GEBRUIKSAANWYSINGS soos aangedui op die AMAZING 480 SC etiket.

ONKRUIDE NORMAAL BEHEER: vanaf saailing (1 tot 2 blare) tot die stadium aangedui.

ARTEMIS 750 WG 60 g / ha	PLUS AMAZING 480 SC 260 mL / ha	
	PLUS Geskikte, geregistreerde bymiddel bv. ENTRÉE	
Botaniese naam	Algemene naam	Maksimum grootte van onkruidie ten tye van toediening
<i>Panicum schinzii</i>	Soetbuffelsgras	Tot by die bewerking stadium
<i>Rottboellia cochinchinensis</i>	Tarentaalgras	Tot 4 blare
<i>Setaria pallide-fusca</i>	Rooiborselgras	Tot 4 blare
Breëblaar onkruidie:		
<i>Amaranthus hybridus</i>	Gewone misbredie	4 blare
<i>Amaranthus thunbergii</i>	Rooimisbredie	4 blare
<i>Amaranthus deflexus</i>	Meerjarige misbredie	4 blare
<i>Cleome monophylla</i>	Rusperbossie	6 blare

<i>Datura ferox</i>	Grootstinkblaar	3 blare
<i>Datura stramonium</i>	Stinkblaar	4 blare
<i>Schkuhria pinnata</i>	Kleinakkiebos	3 blare
<i>Tagetes minuta</i>	Kakiebos	4 blare
<i>Tribulus terrestris</i>	Gewone dubbeltjie	4 blare
Sorghum spesies:		
<i>Sorghum bicolor</i>	Wilde graansorghum	Tot 7 blare
<i>Sorghum halepense</i>	Johnsongras	Tot 7 blare

Na-opkoms toediening van ARTEMIS 750 WG plus AMAZING 480 SC plus 'n geregistreerde byvoegmiddel (benatter/strooier/penetrant bv. ENTRÉE) vir beheer van *Sorghum* spesies en sekere breëblaaronkruide in mielies:

NOTAS

- Hierdie behandeling kan toegediend word as 'n alleenstaande na-opkoms toediening of as 'n opvolg op 'n vooropkoms toediening van Amazing 480 SC in tenkmengsel met Farmag Metolachlor 915 S soos aangedui op die geregistreerde etikette.
- Buccaneer 960 EC of Farmag Acetochlor 900 EC kan teen 400 tot 800 mL per hektaar by hierdie tenkmengsel gevoeg word vir residuele beheer van grasonkruide.
- 'n Geskikte, geregistreerde byvoegmiddel (benatter/strooier/penetrant bv. ENTRÉE) teen die aanbevole dosis moet gebruik word met alle na-opkoms toedienings van ARTEMIS 750 WG plus Amazing 480 SC, soos aangedui op die geregistreerde etiket.
- Moet nie hierdie mengsel uit die lug toedien nie.
- Dien toe met valarmspuipunte (gerigte bespuiting) om te verhoed dat direk in planttregter gespuï word en om te verseker dat die onkruid nie deur die gewas se blare van die bespuiting beskerm word nie.
- Verwys na die Amazing 480 SC en Terbutylazine 500 SC of Farmazine Super 600 SC etikette vir 'n volledige lys van onkruide wat deur hierdie produkte beheer word.
- Voldoen aan alle GEBRUIKSBEPERKINGS en GEBRUIKSAANWYSINGS soos aangedui op die Amazing 480 SC en Terbutylazine 500 SC of Farmazine Super 600 SC etiket.

ARTEMIS 750 WDG 60 g / ha + Amazing 480 SC 210 to 260 mL / ha	PLUS Terbutylazine 500 SC 960 mL	OR PLUS Farmazine Super 600 SC 800 mL / ha	PLUS 'n Geregistreerde bymiddel (benatter/ strooier/penetrant) teen die aanbevole tarief) bv. ENTRÉE
--	---	--	---

ONKRUIDE NORMAAL BEHEER Van saailing (1 tot 2 blare) tot stadium soos aangedui.

Botaniese naam	Algemene naam	Maksimum grootte van onkruide ten tye van toediening
Grasse:		
<i>Panicum schinzii</i>	Soetbuffelsgras	Tot by die bewerking stadium
<i>Rottboellia cochinchinensis</i>	Tarentaalgras	Tot 4 blare
<i>Setaria pallide-fusca</i>	Rooi borselgras	Tot 4 blare
Broadleaf weeds:		
<i>Acanthospermum hispidum</i>	Regopsterklits	6 blaar
<i>Amaranthus hybridus</i>	Gewone misbredie	4 blare
<i>Amaranthus thunbergii</i>	Rooimisbredie	4 blare
<i>Amaranthus deflexus</i>	Meerjarige misbredie	4 blare

<i>Bidens pilosa</i>	Knapsekêrel	6 blaar
<i>Cleome monophylla</i>	Rusperbossie	6 blare
<i>Commelinia benghalensis</i>	Bengaalse wandelende jood	6 blaar
<i>Datura ferox</i>	Grootstinkblaar	3 blare
<i>Datura stramonium</i>	Stinkblaar	4 blare
<i>Galinsoga parviflora</i>	Knopkruid	6 blaar
<i>Portulaca oleracea</i>	Porselein	6 blaar
<i>Richardia brasiliensis</i>	Tropiese Richardia	6 blaar
<i>Schkuhria pinnata</i>	Kleinkakiebos	3 blare

<i>Tribulus terrestris</i>	Gewone dubbeltjie	4 blare
<i>Xanthium strumarium*</i>	Kankerroos	6 blaar
Sorghum spesies:		
<i>Sorghum bicolor</i>	Wilde graansorghum	Tot 7 blare
<i>Sorghum halepense</i>	Johnsongras	Tot 7 blare

* Slegs teen die hoogste aanbevole dosisse.

NOTA

Hoër dosisse van **Farmazine Super 600 SC** of **Terbutylazine 500 SC** kan toegedien word vir die beheer van addisionele breëblaaronkruidespesies, moeilik beheerbare onkruide, hoë onkruiddruk situasies en langer residuële beheer van breëblaaronkruide. Verwys na die **Farmazine Super 600 SC** of **Terbutylazine 500 SC** etikette vir dosisse, en 'n lys van bykomende onkruide wat deur hierdie produk beheer word.

Raadpleeg die etikette vir **Amazing 480 SC**, **Farmazine Super 600 SC**, **Buccaneer 960** (L9424) **Farmag Acetochlor 900 EC**, **Terbutylazine 500 SC** en geregistreerde bymiddel wat gebruik word vir toepaslike **WAARSKUWINGS**, **VOORSORGMAATREËLS** en **GEBRUIKSAANWYSINGS**.

Die registrasiehouers van die volgende produkte wat in hierdie etiket genoem word, is **Castle Ag-Chem (Edms) Bpk** en **Cedar Falls Properties 130 (Edms) Bpk**, wat almal filiale van **FarmAg International (Edms) Bpk** is.

Amazing 480 SC (L 9725), geregistreer deur Cedar Falls Properties 130 (Edms) Bpk.

Buccaneer 960 (L 9424), geregistreer deur Cedar Falls Properties 130 (Edms) Bpk.

Farmag Acetochlor 900 EC (L 9019), geregistreer deur Cedar Falls Properties 130 (Edms) Bpk.

Terbutylazine 500 SC (L 9328), geregistreer deur Cedar Falls Properties 130 (Edms) Bpk.

Farmag Metolachlor 915 S (L 7179), geregistreer deur Castle Ag-chem (Edms) Bpk.

Farmazine Super 600 SC (L 7537), geregistreer deur Castle Ag-chem (Edms) Bpk.

ENTRÉE (L8055), geregistreer deur Miller Chemicals / Hygrotech)

HERBICIDE GROUP CODE

2

ONKRUIJDDODER GROEPKODE

A water dispersible granule, selective post-emergence grass and broadleaf herbicide for the control of grasses, sorghum species and broadleaf weeds in maize.

'n Water dispergeerbare korrelonkruiddoder vir die selektiewe beheer van sekere na-opkoms grasse, sorghum spesies en breëblaaronkruide in mielies.

ACTIVE INGREDIENT/AKTIEWE BESTANDDEEL:

nicosulfuron (sulfonyl urea).....750g/kg.....nicosulfuron (sulfonylureum)

WARNING

Hazard Statements:

Causes skin irritation.

Causes serious eye irritation.

Very toxic to aquatic life.

Precautionary Statements:

IF ON SKIN: Wash with plenty of soap and water.

IF IN EYES: Rinse cautiously with water for several minutes.

Remove contact lenses, if present and easy to do. Continue rinsing.

If skin irritation occurs: Get medical advice/attention.

If eye irritation persists: Get medical advice/attention.
